### Textile Dyeing Grade Refined Salt

Sodium base chemicals are used for the textile dyeing process, as they play an ionic role to help the dye transfer onto the fabric. Sangha Chemicals' Textile Dyeing Refined Salt is specifically made for Textile Dyeing units. It ensures dye exhaustion onto the fabric and ensures an even and smooth colour.

#### Available Packing:

Textile Dyeing Grade Refined Salt is available in 50 kg bags

#### Usage:

Textile Dyeing

#### Technical Specifications:

Parameter	Value
Chemical formula	Sodium Chloride (NaCl)
Purity	99.8% NaCl
Moisture Content	Less than 0.2%
pH (1% Solution)	6.5 – 7.5
Color	White or Colourless
Grain Size	Available in Different Sizes
Total Hardness (as Ca++)	Nil
Total Hardness (as Mg++)	Nil
Total Hardness (8% Solution Method)	Less than 20PPM
Iron (Fe <sub>2</sub> O <sub>3</sub> )	Less than 10PPM
Whiteness	96 W.H
Physical Appearance	Free Flowing Crystalline Salt
