### White Crystal Animal Lick Salt

Himalayan rock salt animal licks are natural, mineral-rich salt blocks specifically designed for livestock and pets. Sourced from ancient, pure Himalayan deposits, these salt licks are packed with essential minerals such as calcium, magnesium, potassium, and trace elements that support overall animal health. By encouraging animals to lick the salt, they help promote hydration, improve digestion, and enhance electrolyte balance, making it a beneficial addition to their diet. Ideal for grazing animals like cattle, horses, and goats, as well as pets, these salt blocks are a natural, chemical-free way to ensure animals receive vital nutrients.

#### Available Packing:

Available according to the customer's special requirements.

#### Usage:

Feed
